

The Citizen Experience Today

Our Citizens are Our Customers

Citizens Today Expect Easy, Online Services
Citizens today expect access to government services to function the same way as buying a book from Amazon or booking a flight on Southwest Airlines.

Easy → Simple → Fast → ...and mobile

Pay a parking ticket

Pay water bill

Renew driver's license

Get a building permit

File an unemployment claim

Register a business

Report building violations

Order custom license plates

Apply for a job

Get a birth certificate

Report a pothole

File a consumer complaint

Top 3 Priorities for Digital Government Now

98% are improving online experience for citizens

73% are optimizing operations and lowering costs

64% are offering increased public participation and engagement

How States are Enabling Digital Government Now

78% are consolidating infrastructure

93% are maintaining or expanding a managed services model

52% are collaborating more with state agencies

Explore the full 'art of the possible' for mainframe modernization with Ensono. If you think it only means 'migration to the cloud'—it most definitely doesn't.

Brian Klingbeil, Ensono Chief Strategy Officer

The Mainframe is a Vital Enabler of Digital Government

The Mainframe is a Vital Enabler of Digital Government Mainframe still provides the industrial strength processing and throughput your state requires. Moving to a MFaaS model (mainframe as a service) reduces barriers to innovation and reduces TCO. Ensono helps state and local governments save money and reduce risk while making complex hybrid IT work together seamlessly.

Maintain, secure and control your data, applications and network across multiple agencies and partners

Enable modern capabilities to make the most of your existing code and data, to allow seamless communication between mainframe and non-mainframe apps

Convert and consolidate select apps on the mainframe to enhance agility of mainframe apps and data with cloud native functions

Migrate select apps, codes and data to the cloud by creating an intentionally built environment

Save 20% immediately on infrastructure management and hosted mainframe services while avoiding any upfront transition costs

Free budget by moving to a managed service model to fund other initiatives

Choose Ensono to Realize the Full Potential of Your Mainframe

Add new capabilities to reduce operating and labor costs and increase processing volume

Leverage the logic, security and flexibility of your legacy transaction system
